Cross Bore Prevention Program

With over **40 years** of experience, we understand the implications of failing to prevent or identify a Cross Bore. For that reason, we continually invest in new technology, review and refine our process.

Customers like you choose us with the confidence of knowing VIS delivers high-quality, cost-effective, on-time results.

Put our expertise to work for you!

The VIS Advantage

Make Confident Decisions

Our cross bore program ensures the high-quality, actionable data needed to identify and analyze risk. Because we understand the implications of failure to prevent or identify a cross bore, our Quality Control team reviews 100% of every inspection, ensuring your Trenchless project receives final approval from your Utility.

Start Your Projects Faster

Our response times are 45 – 50% faster than industry standards. Faster response time means less downtime. It also means you can schedule shorter wait times between projects, improving your team's efficiency.

Reduce Downtime

We're sure you can relate – You didn't schedule cleaning before the inspection because the pipe segment is clean; turns out it's not! No problem, **VIS is a full-service provider**. We can quickly clean, cut roots, remove debris, or do whatever is needed to get the inspection done—removing the need to schedule a secondary contractor and wait for their availability.

No Dig Repairs

Accidents happen – a pipe segment gets broken during excavation, or a cross bore occurs. With our CIPP Trenchless Repair capabilities, we can quickly repair the segment without digging it up. Combine that with our fast response time and your saving time and money.

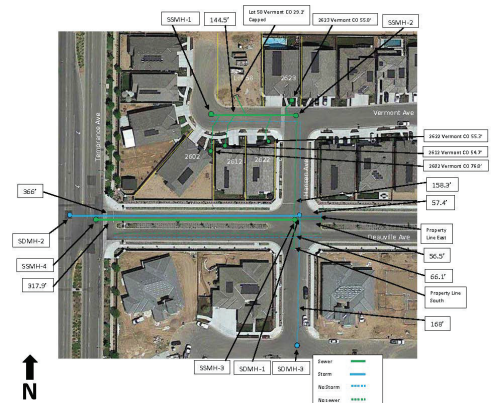

Turn-key Project Management

Our Project Management Team has extensive experience dealing with Utilities. We work the utility, define the inspection scope of work and act as your liaison from the beginning to the end of the job.

Grow Your Bottom Line

Use us as an alternative – we are committed to providing the highest quality work at a lower cost. Our goal is to partner in your success and succeed with you.
